### Word Search Maker

<https://wordsearchwizard.com>

word search puzzles covering a variety of topics appropriate for primary grade, middle school and high school students

The site includes word search puzzles covering a variety of topics appropriate for primary grade, middle school and high school students, but many of the topics will be of interest to puzzle-engaged adults as well. By creating a Word Search Wizard account, you'll be able to create your own puzzles and save them so that you or others can return to view them. This is a great way for teachers to create word search puzzles that they update year-to-year, or create a puzzle you know others would be interested in using themselves. You can create custom word searches without setting up an account, but you will not be able share that puzzle with others, and if you return to the site after clearing your browser settings the puzzle will no longer be available.
