### Starfish Country Home School Vision

[http://www.schsf.org/content/index.php?option=com\\_content&task=view&id=11&Itemid=18](http://www.schsf.org/content/index.php?option=com_content&task=view&id=11&Itemid=18)

The Starfish Country Home School aspires to be the best school in northern Thailand. The school will accept needy children without regard to their religious affiliation and national or ethnic origin and will provide them a quality education that emphasizes communication skills in Thai and English, technology, mathematics, visual and performing arts, international cultures and developing respect and compassion for others. The Starfish Country Home School Foundation will provide a safe and secure modern residence and personal guidance for all of its students as they mature. Those children that can achieve the required academic excellence will remain at the school until they are ready to attend university and will be further supported at university. The education will always be free, diversified and directed to meet the needs, interests and abilities of the individual student.
