### Norah Jones - ...Featuring

<http://vaagenfamily.blogspot.com/2010/11/norah-jones-featuring.html>

I am a HUGE fan of Norah Jones. And when I heard that One2One Network was offering me a chance to review her music, I was SO excited! She has that husky, bluesy, smooth voice that I have always loved. Take a listen by clicking below! Another awesome thing about this album is that she is only "featured" in all the songs! She is performing with many other artists, and there is not one song on this album that is like another. Some of them completely shocked me, for example, her duet with Willie Nelson in "Baby It's Cold Outside!"? What a strange combination- Norah and Willie, and what a strange song to imagine them singing together- but it was FABULOUS! The album "Featuring Norah Jones" was released to the public November 17th, and if you haven't bought it yet, this would make a wonderful addition to your music collection! See below for the list of songs and artists in this new album.
